PROFESSIONAL SUMMARY

PHP Backend Developer and WordPress Plugin Engineer with 6+ years of professional experience building commercial WordPress plugins, web applications, and automation systems. Built the complete backend for Zaplane (zaplane.app), a WordPress-native automation platform competing with Zapier and Make. Sole backend developer of Easy Content Manager (easycontentmanager.pro). Designed the initial ORM and core architecture for GemBoards (gemboards.com). Creator of WPFlint, a Laravel-inspired open-source WordPress plugin development framework. Skilled in CI/CD pipelines, automated deployments across shared hosting and VPS (DigitalOcean, AWS), and Python-based automation scripting. Promoted from Intern to Team Lead within two years at Kodezen. Hackathon and CP Champion (RIC Techno Fest 2024). Currently pursuing BSc in CSE at the University of Dhaka.

EDUCATION

BSc in Computer Science & Engineering

2023 – 2027 (Expected)

FEC, Affiliate By University of Dhaka, Bangladesh

AWARDS & ACHIEVEMENTS

- Hackathon Champion — RIC Techno Fest 2024
- Competitive Programming (CP) Champion — RIC Techno Fest 2024

TECHNICAL SKILLS

Backend: PHP 8, Laravel, Livewire, WordPress Core, WooCommerce, Filament

Frontend: React JS, JavaScript, TypeScript, HTML, CSS

Databases: MySQL, PostgreSQL, Redis

DevOps & Infrastructure: Linux, Nginx, DigitalOcean, AWS, Docker, GitHub Actions, CI/CD Pipelines

Deployment: Fully automated deployment workflows from shared hosting to VPS environments

Automation & Scripting: Python scripting, web scraping, task automation, bot development

Architecture: WordPress plugin framework design, ORM design, IoC containers, middleware pipelines

PROFESSIONAL EXPERIENCE

Team Lead | Kodezen, Dhaka, Bangladesh

2025 – 2026

- Led backend development of Zaplane (zaplane.app), a WordPress-native automation platform replacing Zapier, Make, and Ottokit — built the complete backend including workflow engine, trigger/action system, and third-party integrations.
- Guided a cross-functional
- Developed WPFlint, a Laravel-inspired open-source WordPress plugin framework, alongside product delivery responsibilities.

Senior PHP Developer | Kodezen, Dhaka, Bangladesh

2024 – 2025

- Promoted based on consistent delivery quality. First solo project: built the complete backend for Easy Content Manager (easycontentmanager.pro), a WordPress plugin for custom post types, fields, and taxonomy management — now a stable, live commercial product.

- Designed and built the initial ORM layer and core structure for GemBoards (gemboards.com), a WordPress-native project management plugin with Kanban boards and sprint planning. Handed off to other developers after foundation was complete.
- Contributed partially to GemCRM, a WordPress CRM plugin for email campaigns, contact management, and segmentation.

PHP Developer | Kodezen, Dhaka, Bangladesh

2023 – 2024

- Joined as an intern and promoted to full-time developer within one month based on demonstrated working speed, code quality, and ability to understand complex codebases quickly.
- Worked extensively on Academy LMS, building multiple production add-ons: Gradebook, GamiPress integration, Wishlist Member integration, MemberPress integration, Push Notification system, and others.
- Set up CI/CD pipelines with GitHub Actions and automated deployment workflows for plugin releases.

PHP & WordPress Developer | Techpirates

2020 – 2023

- Built WordPress plugins and website components for the company's product ecosystem.
- Contributed to a learn-and-earn platform (web + Java-based mobile app) with coin earning, exchange, and gamification features.
- Gained hands-on cybersecurity knowledge through CTF events and hackathon organization on the platform.
- Developed plugin architectures following WordPress coding standards with focus on extensibility and backward compatibility.

PHP Developer | Genuine Software Solutions

2018 – 2020

- Built agency websites for clients and developed an ERP system for Bangladeshi businesses handling inventory, HR, and basic financial reporting.
- Developed foundational skills in PHP, MySQL, server management, and client-facing project delivery.

LIVE PRODUCTS & OPEN SOURCE

Zaplane — WordPress Automation Platform | zaplane.app

- Built the complete backend. WordPress-native workflow automation with triggers, actions, and integrations (Mailchimp, FluentCRM, Google Sheets, Slack). Runs inside WordPress with zero external dependency and unlimited task executions.

Easy Content Manager — WordPress CPT Plugin | easycntentmanager.pro

- Built the complete backend solo. Custom post types, custom fields, and taxonomy management inside WordPress. Stable live commercial product.

GemBoards — Project Management Plugin | gemboards.com

- Designed and built the initial ORM and core architecture. Kanban boards, sprint planning, task management, and team collaboration. Listed on wordpress.org/plugins/gemboards.

Academy LMS Add-ons — WordPress LMS Ecosystem | academylms.net

- Built multiple production add-ons: Gradebook, GamiPress, Wishlist Member, MemberPress, Push Notification. Part of an LMS ecosystem serving thousands of users globally.

WPFlint — Open-Source Plugin Framework | github.com/thee-prime/wpflint

- Laravel-inspired framework for WordPress plugins: IoC container, ORM, migrations, routing, middleware, validation, events, caching, queue/jobs, scheduler, admin builders, Gutenberg blocks, WP-CLI generators. Published on Packagist. Zero production dependencies.
